

PWA

**ANSI / ASME B73.1
PROCESS PUMP**

COMPETITIVE ADVANTAGES

Carbon Steel vs. Ductile Iron

- High strength, impact resistant Carbon Steel liquid ends for improved durability and pressure containment at no additional cost.
- Replaces non-repairable, ductile iron casing and impellers, with repairable carbon steel, for extended component life.

Flange Arrangement Options

- Standard ANSI class 150# flange pressure rating, flat or raised face design, provided to meet customer specified requirements at no additional cost.
- Optional ANSI class 300# flange (375 PSI MAWP), flat or raised face design, provided at no additional cost over 150# flanges.

Shaft and Bearing Assembly

- Upgraded 316 SS vs. 4140 steel pump shaft is standard at no additional cost.
- Proven flinger disk lubrication device to ensure effective bearing lubrication. Provides 30% increased bearing L-10 life and minimum 15°F lower bearing operating temperatures compared to flood oil design.

5 Year Unconditional Power Frame Warranty is Standard at No Additional Cost.

Power Frame Superiority

- Superior high strength carbon steel vs. inferior cast iron power frame material.
- Addresses environmental and safety concerns.
- Exclusive finned bearing frame for maximum heat dissipation.
- Convenient dual oil level sight glasses provide flexible viewing as standard.
- Internal surfaces cleaned, rust preventative applied, and enamel coated assuring internal casting cleanliness.

Standard bore

Tapered bore

Big bore

Component seal

Single cartridge seal

Dual cartridge seal

Seal Chamber / Sealing Solutions

- Multiple seal chambers for maximum sealing flexibility for all process applications.
- Accommodates all mechanical seal manufacturer's component and ANSI cartridge seal configurations.
- Supports the full array of CPI seal support system options.
- Ensures superior leak protection with maximum heat dissipation, maximizing seal life and pump reliability.

Baseplate Systems

- Baseplate mounting structures designed to meet the full variety of installation applications.
- Designed for optimum unit reliability, while meeting user preferences for economy, chemical resistance and installation features.

All materials are USA sourced to meet all Country of Origin requirements.

Structural Steel Base

Fabricated Steel Base

Fabricated Steel PLUS™ Base

Polymer composite, non-metallic

DESIGN FEATURES AND BENEFITS

● Casing Gasket

- Fully confined to maximize liquid sealing
- Protects casing fits from corrosion, therefore increase maintenance ease and proper alignment during reassembly

● Seal Chamber / Sealing Options

- Multiple seal chambers for maximum sealing flexibility for all process applications.
- Accommodates all mechanical seal manufacturer's component and ANSI cartridge seal configurations
- Supports the full array of CPI seal support system options
- Ensures superior leak protection with maximum heat dissipation, maximizing seal life and pump reliability

● Frame Adapter

- Carbon Steel standard for increased strength and stability

● Casing

- Carbon Steel ASTM A216 material standard for improved durability and pressure containment
- Precision serrated flange face finish for optimum gasket retention and sealing
- Class 150# standard and 300# option
- Self venting, centerline mounted discharge flange
- Casing thickness exceeds ASME B73.1 specification for increased casing life
- Back pull out design for easy maintenance
- Full line of corrosive resistant materials

● Quality

- Manufactured and tested in the USA

● Impeller

- Fully open for increased corrosion, abrasion and solids wear resistance
- Back pump out vanes for reduced thrust loading and seal chamber operating pressure

● Delivery

- Pump components strategically inventoried for rapid shipment in a variety of material options.

● Casing Drain

- Optional casing drain and drain piping

● Foot Mounted Casing

- Maximum casing stability and support for back pull out maintenance feature
- Reduced vibration

ePOD Pump Selector

- Access to end users and specifiers to select your pump application online at www.pumpworksindustrial.com

Vent

- Oversized vent/fill cap for easy oil changes and elimination of contamination during oil change

Bearing Lubrication

- Flinger disk lubrication device to ensure effective bearing lubrication and lower bearing operating temperatures

Labyrinth Oil Seal

- Non-contacting Labyrinth bearing housing isolators providing positive sealing environment preventing housing contamination
- Optional Sealed bearing frame with magnetic seals and expansion chamber for severe environments

Thrust Bearing

- Heavy duty double row standard
- Optional duplex angular contact thrust bearing

Externally Adjustable Shaft and Impeller System

- Easily adjust impeller to front casing clearance without removal of pump from piping
- Restoration to factory efficiencies

Bearing Housing

- Large oil sump capacity for increased cooling
- Standard flinger disk design, with optional regreasable, purge oil mist and pure oil mist lubrication
- Standard finned design for maximum heat dissipation
- Contoured internal slope for positive collection of metal contaminants by magnetic drain plug
- Optional 316 SS Tube Finned Cooler for high process temperatures above 350° F to 700° F
- Internal surfaces cleaned, rust preventative applied, and enamel coated assuring internal casting cleanliness

Two Oil Level Sight Glasses

- 1" sight glass located on each side of bearing housing for flexible viewing

Oil Sump Drain Plug

- Magnetic plug to maintain bearing housing cleanliness and increased protection

Shaft and Bearing System

- Rigid, heavy duty design for minimal shaft deflection at seal area and increased reliability
- Exceeds ASME B73.1 bearing life specification requirements
- 316L Shaft material is standard with optional material upgrades available

LEVERAGING TECHNOLOGY

PumpWorks Industrial leverages technology by providing:

- Superior manufacturing capabilities.
- Company owned USA foundry.
- Extensive inventory selection.
- Professional, reliable service.

FOUNDRY PumpWorks Castings

- Precision investment cast impellers yields exceptionally smooth surface finish ensuring repeatable, efficient hydraulic performance.
- One ton piece part capacity. Metallurgies from Carbon Steel through Titanium.
- Complete in house casting inspection includes certified spectrographic, hardness, physical properties and live casting X-ray analysis.

MANUFACTURING

- All of our pumps are manufactured and tested in the United States of America, utilizing exclusive state-of-the-art manufacturing equipment and US foundries for all castings. This ensures consistent quality, product availability, and low cost of ownership.

INVENTORY

- Pump and component inventory in a variety of material options are strategically located through the Northern hemisphere ensuring consistent, rapid shipment tailored to customer requirements.

SERVICE

- Fully staffed professional sales and service teams providing superior customer support is available 24/7/365.
- ePOD Pump Selector access by end users and specifiers available online at no additional cost at www.pumpworksindustrial.com

HYDRAULIC PERFORMANCE COVERAGE

60 Hz Performance Coverage

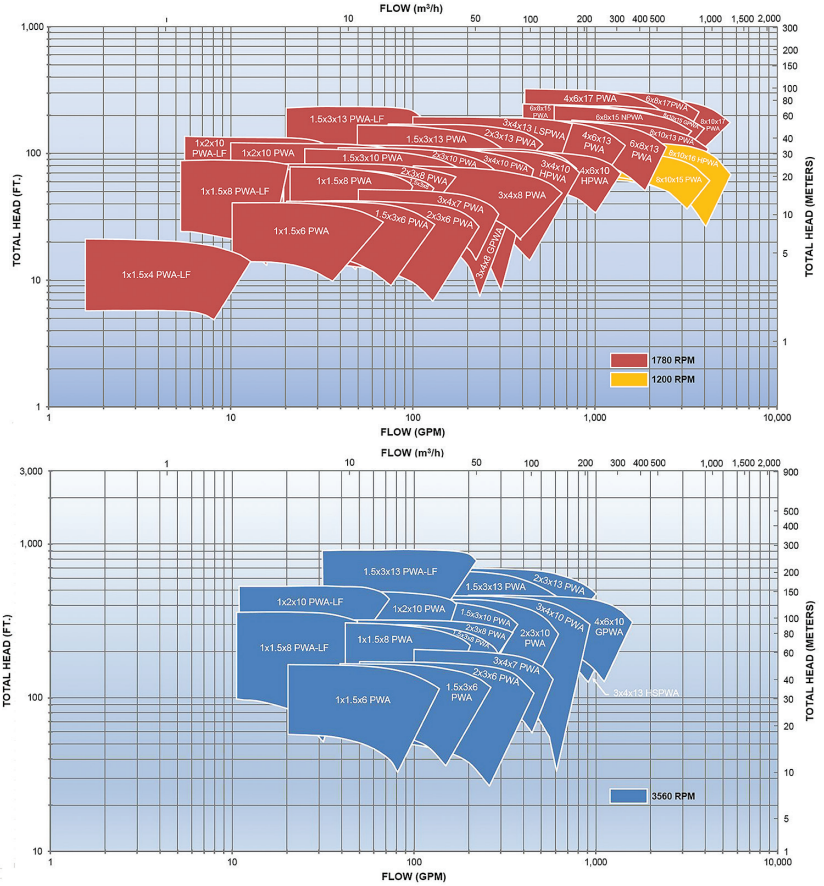

Visit our web site at www.pumpworksindustrial.com and specify flow and performance needs and obtain pump selection and performance curve.

Performances shown are nominal and are to be used for preliminary selection only.

Capabilities

- Capacities to 1,364 m³/h | 7,000 GPM
- Heads to 223 m | 730 ft
- Temperatures to 371° C | 700° F
- Pressures to 26 bar | 375 PSIG

NOTES:

- 17 inch pump sizes - Shaft diameter at Stuffing Box / Seal Chamber is 2.25 inches (57) with sleeve. Shaft Sleeve Outside Diameter is 2.75 inches (70) for packing and 2.5 inches (64) for mechanical seals.
Seal chamber bore is 4.75 inches (121). Stuffing box bore is 3.625 inches (92).
- 17 inch pump sizes power limitation per 100 RPM is 20HP (15kW).
- Hydro-static test pressure equal to 1.5 times Maximum Allowable Working Pressure.
- Pressure ratings to 740 PSI (5137 kPa) – consult factory.
- Tube Finned Cooler, Jacketed Seal Chamber, Graphite Impeller O-ring and Casing Gasket for temperatures between 450° F (232° C) to 700° F (370° C).

Test Facilities

- Test flows up to 7,500 GPM.
- Discharge test pressures up to 740 PSI.
- Supply tank rated from full vacuum to 65 psi.
- 460 volt through 500 HP, 3600 RPM.
- Variable Frequency Drive for precise speed control through 500 HP @ 460 volt.

See our Test Facilities Brochure for more information.

Typical Industries

- Chemical/Petrochemical
- Pulp and Paper
- Food and Beverage
- Oil and Gas
- Primary Metals Manufacturing
- Mining
- Power Generation
- Waste Treatment
- General Industrial
